

Slide Shoe for Cams

1-103

Advantages

- 2 parts.
- Tool-less assembly.
- Matching cams as of 35 mm, product system 1-102 and 7-105.
- No abrasion of the metal and therefore safety concerning electronic built-in components.
- Good gliding properties, therefore low friction coefficient.
- The assembly will be carried out with the already installed quarter-turn, it is possible to retrofit at any time.
- Vibration-proof according to DIN EN 61373.

Material

- **Slide shoe:** POM, natural

Remarks

The slide shoe **cannot** be used with the following cams: 200-0606, 200-0608, 200-0610, 200-0613, 200-0614, 200-0402, 200-0404, 200-0406, 200-0408, 200-0410, 200-0506, 200-0508 and 200-0510 and **not** for 3-point cams of product system 2-150, 1-102 and 7-105.

1. ramp 3mm
2. place latch under the cam.
3. slide housing onto the cam and the latch.
4. latch must lock audibly into the window.

Note: the H-dimension diminishes by 2mm. E.g. cam 200-0418 (H-dimension 18mm) results into an H-dimension of 16mm.

Slide shoe
