

Roller Cam height adjustable

1-105

Advantages

- The roller cam reduces the friction and eases the closing.
- No scratching or spalling of the paint at the inner part of the bending.
- Adjustable in height from H20 to H25.
- Suitable for all inserts, swinghandles and multipoint locking systems with square 8mm.
- H-dimension of the cam easy to adjust because of impressed height marks.

• Cam: zinc die, zinc plated

• Roller: PA, black

• Tenon blocks, distance bushing: zinc die, untreated

• Socket head screw: teel, zinc plated

Remarks

Roller cam
